

Abstract

Light emitting diode arrangement for a high power light emitting diode and method for producing a light emitting diode arrangement

The invention relates to a light emitting diode arrangement, comprising at least one high power light emitting diode (34), the high power light emitting diode (34) being mounted onto a flexible printed circuit board (10). In this case, the light emitting diode arrangement is distinguished primarily by its simple mounting.

Furthermore, the invention relates to a method for producing such a light emitting diode arrangement.
